

## **BVDA PRACTICAL CPD**

### ***Oral Surgery:***

## ***Extraction Techniques & Practical Tips***

A highly practical approach to the most frequent oral surgery encountered in practice.

Extraction can prove challenging and frustrating – take the pain out of it! Delegates will gain the knowledge and confidence to approach cases, from indications for extraction, to retrieving root remnants.

Suitable for all general practitioners, from beginner to intermediate level, this course will also interest those considering surgical and dental qualifications.

Topics to be covered include:

- Indications for extraction & alternatives
- Closed technique
- Surgical technique
- Extraction of canines
- Multi-rooted dentition
- Extraction complications

**Comprehensive, practical, one day format.**

**Morning lectures complemented by a full afternoon of hands-on, wet-lab tutoring.**

Please see the BVDA booking form & CPD Calendar for the latest dates, venues & prices.
