

## **BVDA PRACTICAL CPD**

### ***Oral Radiology:***

### ***Everything You Need to Know!***

A highly practical approach to essential dental and oral cavity imaging for all cases encountered in practice.

View the hidden 60-70% (where pathology is!) – revolutionise your approach!

Dentistry and oral surgery cannot be properly performed without vital diagnostic, radiographic information. Delegates will gain the knowledge and confidence to image and interpret cases, from extraction to oral masses.

Suitable for all general practitioners, beginner to intermediate level, this course will also interest those considering surgical, imaging and dental qualifications.

Topics to be covered include:

- Indications
- Parallel technique
- Bisecting angle technique
- Film interpretation
- Feline dental cases
- Oral & nasal masses

**Comprehensive, practical, one day format.**

**Morning lectures complemented by a full afternoon of hands-on, wet-lab tutoring.**

Please see the BVDA booking form & CPD Calendar for the latest dates, venues & prices.
